THE 5 BENEFITS OF LUDECO 12 VOLTS OUTDOOR LIGHTING

- Unlike solar, you have outdoor lighting that works all year round
- Most competitively priced outdoor lighting on low volts
- Easy to install due to the unique Ludeco connection system
- Safe for humans and animals
- Very low energy consumption

Ludeco-System

The connector, which is fixed to the light cable, is easy to connect to the main cable.

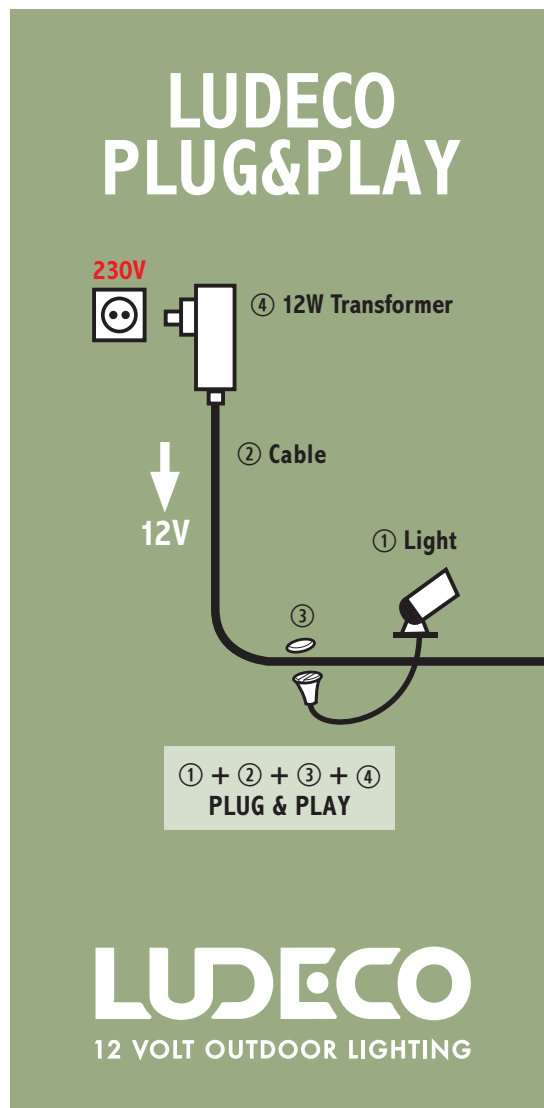

LUDECO

12 VOLT OUTDOOR LIGHTING

The **Ludeco-12 volt System** is easy to set up by yourself and the cable does not have to be dug 50 cm below the ground (unlike 230 volts), so there is no need for an electrician.

It's this simple:

- ① Place the lights where you want them in the garden;
- ② Run the cable along the lights towards the electrical outlet;
- ③ Connect the lights by sliding the connector already attached to the light cable onto the cable;
- ④ Plug the transformer plug into the electrical outlet.
